

Cableless
Comfortable & Stylish
High Weight Capacity!

Our bestselling mobility aid

neXus 3, is our bestselling rollator with a wide backstrap and robust wheels, making it a perfect everyday-life-companion.

Easy to fold

With the first-ever patented cross-folding frame, it set the standard for future walking aids design. The neXus 3 rollator features a cross-folding frame, making it exceptionally easy to fold. The soft zippered bag folds together while remaining on the rollator. It can stand independently in a folded position with the bag on the rollator. The cross-folding design also enables the rollator to be partially folded to pass through narrow spaces.

Cableless and wide backstrap

The cable-free and anatomic brake handles increases safety and comfortability. No cables catch on objects around the home. The cable-free braking system also ensures years of trouble-free use. We have had anatomy and strong

visual communication in mind when designing the brake handles. They are comfortable, and the red ball is designed for those with limited hand dexterity and allows the user to apply/disengage the brakes, using the palm of their hands. The cross-folding structure enables superior walking ergonomics with ample walking space.

The padded, contoured, and cushioned seat offers a comfortable resting spot. The backstrap can be flipped to allow for two-position seating as well as a visual aid for achieving optimal gait.

Available in black, blue and red

The neXus 3 is available in three different sizes; neXus 3 Super Low (19"), neXus 3 Low (22"), and neXus 3 Standard (24")*. All sizes are available in Black, Blue and Red (Burgundy) colour.

* Measurement for sizes is floor to bottom of seat pan.

Features

Padded Backrest

Back comfort while seated. Can be flipped both ways and is included with the rollator.

Foam Cushioned Seat

Offers a comfortable resting spot while walking.

Anatomic Brake Handles

The anatomic brake handles are easy and comfortable to use.

Accessories

Hard Basket

Basket ideal for shopping. Maximum load 4.5kg/10 lb. Part no. 4510.
